

CREATE

CONFERENCE FOR NEW CREATIVES

NOV 8-9
2023
BRUSSELS
BELGIUM

We are thrilled to announce the first European edition of our community event, CREATE on November 8-9! This year's unmissable event will be hosted in the heart of Europe, Brussels, and we are looking forward to welcoming creative automation enthusiasts to learn how to take graphical production to a whole new level.

Every year we gather brands, agencies, and technology providers from around the world to discuss market and industry trends, share tips and tricks on how the right Creative Tech will enable companies to create at scale, and to learn more about MarTech solutions in the market. Be sure to be there!

There will be one-to-one meetings with experts, customer use cases, and business opportunities.

As a sponsor to this event, you will receive exclusive access to an ever-expanding global creative automation community. Get an opportunity to present your business strategy and solutions, share inspiring use cases, and share the value of a partnership with CHILI publish to help companies create at scale.

See you in Brussels!
